

# THE WAY OF AN INDIAN<sup>2</sup>

BY Frederic Remington

**T**HIS STRIKING PAINTING BY FREDERIC REMINGTON IS FROM HIS STORY "THE WAY OF AN INDIAN," WHICH APPEARS IN THE NOVEMBER ISSUE OF THE "COSMOPOLITAN MAGAZINE," WHERE IT WILL RUN SERIALLY IN SUCCEEDING NUMBERS.

# A HUNDRED WAYS TO BREAK YOUR NECK

**Why Each New Death-Involving Amusement Enterprise Is Scientifically More Perilous Than Its Predecessor.**

A RECENT number of that distinguished technical weekly, The Scientific American, takes up the subject of the new hair-raising feats which have become popular in circus and other amusement enterprises. Analyzing the "Loop the Loop," the "Devil's Wheel," and other hair-raising acts, the editor points out the various principles of the mechanics involved and explains how each new invention is scientifically more perilous than the other.

And in the good work of bringing the dangers of these exhibi-

ties to the minds of the people a prominent place must be given to the feat known as "the human cannon ball," which has already caused deaths and injuries to at least a score of adventurous men and women.

The whole mechanism of the cannon consists of a set of powerful springs combined with an air pressure carefully regulated to launch the projectile of a human form at a particular angle to a distance of eighty or a hundred feet, the power varying with the height of the building.

Of all the blood-curdling "acts" that make the spectator yearn for legislative enactment of prevention in the exhibition hall, perhaps "The Wheel of Death," or "The Devil's Wheel," is the most perilous.

The Devil's Wheel is fifteen feet in diameter. Facing his place inside the wheel the performer, mounted on a bicycle, begins to pedal. Simultaneously does the wheel rotate in a reverse direction, moving faster and faster until it attains a high speed. As the wheel reaches the apex of its speed the performer, who has remained at the bottom, suddenly stops pedaling, and with one vast motion is swept to the top; rushes down, and whirled around and around the wheel.

The performer known as Eclair, introduced to American audiences, was another kind of devil's wheel. This was larger than its predecessor by ten feet. A smaller wheel was placed inside and with Eclair tied to it in an spread-eagle fashion, plunged down an incline, the impetus thus given causing the wheel to rotate.

Another perilous device is the "circle of death," described by the editor of the Scientific American as "a flat truncated cone like the rim of a pudding dish" supported by ropes nearly horizontal in position. Only one side of the edge rests on the stage. The bicyclists have entered the centre space, are made to run up and down the steep sides simultaneously with the rotating aloft of the whole apparatus.

From an elevation of forty feet the first section of the track slopes downward at an incline of forty-five degrees. The lower end, turning downward, forms a hollow and a semicircle. It was not to be supposed that the people who won their bread by these exhibitions could long resist the possibilities suggested

by the automobile, which in the last year or two has superseded the bicycle. Thus the act known as the "autobomb," in which a woman performer escapes death by a hair's breadth.

In the "planet incline" is another deadly invention. In a big globe-like car men and women are placed as passengers. The great ball rolls down an incline, shoots up a second incline, rolls down a third toboggan and is brought to a stop. But the slightest variation in the course would precipitate the occupants to the ground a hundred feet below.

A woman bicyclist—known as "The Human Arrow"—rushes down a plane fifty feet long, inclined at an angle of 25 degrees, and ending in a short upper curve, flies through fifty feet of space, striking another plane inclined upward, the second movement having the effect of bringing the bicyclist to a standstill.

An English acrobat, standing at the top of a ladder sixty feet high, jumps into a tank of water only eight feet wide. A momentary loss of nerve, involving the miscalculation of a few inches, would send him to his death.

Even more dangerous is the act of Professor Alfred Chapuis, riding astride a wire suspended in a downward incline from the top of a mountain across an immense chasm to a point a mile away, and how many lives of daring tourists have been claimed by the Naples needle in Windermer, England, can scarcely be counted.

involvement in the delicate coloring required for these pastels came through suggestions that his daughter-in-law, who is employed as a colorist, work the color into his painting. "I don't like the idea of getting help in coloring," he says, "but I am willing to endure pain, if it is on the artistic side, as a draftsman that his father-in-law, the artist, and the expert colorist, the critic and the experienced judge, would not do."

"I have bent myself through all my career," he says, "to the needs of the artist, and I have been able to get the publishers for the work with which my name has been identified, to see that I have earned my emolument, and, having done so, to give to the artist my own ideas and try to fulfil my mission."

"And only the artists who have been able to do this, have been able to do what it means to be free. Through 15 months I have worked a little in color. But it is impossible for any busy artist to do this. I have been able to do this, only for perfection in color painting. I am not ungrateful to the career which has been my lot, but I am not independent. But in the hours of my greatest success there has been freedom."

## At First It Carried Mr. Moore, of Chicago, Alone; but Miss Fargo, of New York, Speedily Got Aboard, Said "Yes" and Soon Will Go on a Mile-a-Minute Honeymoon.

### "A Vision in a Cloud of Dust."

He glanced back and saw the vision enveloped in a cloud of dust—just from the wheels under him. More disconcerted than ever, he slowed up, turned out and waited for the vision to pass on into a clear atmosphere. In passing the vision gave him a grateful smile. Young Mr. Moore felt himself sufficed by a warm glow. He followed the vision, smiling and whispering softly to himself:

"I know what's the matter with this machine. The matter is with me. This is an auto built for two."

With young Mr. Moore, of Chicago, to think to ask:

"She's from the North," he said to himself, "down here at the Springs to recuperate. That's mamma's car beside her. Mamma doesn't look such a dragon. I'll take a short cut and see if there are any mutual friends about."

When young Mr. Moore pulled up in front of the hotel the vision in her car was just behind him. On the veranda he saw a man he knew. He cut short his salutations to inquire eagerly:

"Do you happen to know the vision in that car yonder?"

"Know her? She's a chum of my sister's."

Young Mr. Moore, of Chicago, felt himself enlightened. His friend was merciful. "Miss Fargo, permit me to introduce Mr. Moore," Mr. Nathanial F. Moore, of Chicago, Miss Helen Fargo, of New York, and Mrs. Fargo.

Mamma was astute. The vision smiled again out of her dark eyes and floated into the hotel.

"Miss Fargo," whispered young Mr. Moore to the car of his machine, "you're an auto built for two—remember that."

Presently, having defied his dusty auto to get himself up quite regardless, he went down to luncheon and helped the waiter take a dashed cushion to seat him at the vision's table.

Miss Fargo's Own Impressions.

All this happened in the latter part of last May. What followed Miss Fargo lately said in a letter to her oldest friend and bridesmaid-elect in New York.

"Really he is the most startling boy. Are they all so sudden out West, I wonder? But I rather like it. All the rest of that first day we were together. We

came down to luncheon almost immediately, but were about him except that he was from a good family? hardly asked when the waiter brought him straight to our table. Well, you ought to have seen mamma! this stranger? I heard her tell papa, and mamma can hand his little of a shining new double eagle.

"Do you think this respectable boy minded mamma's glacial glances? Not a bit. After luncheon he fairly carried mamma and me out to his big car, and whisked us away for the afternoon. Such audacity I never dreamed of. You ought to have seen mamma gasp when he said:

"An Auto Built for Two."

"This is an auto built for two—but it will carry three!"

"I don't know what mamma had said to our waiter, but it cost Mr. Whirlwind another double eagle to get his seat at our table for dinner."

"There was dancing that evening. But you know what the doctor said when he packed us off down here after the fatigues of my first season—and mamma was watching. He was awfully disappointed—having dreamed all my career, as though he were a sound nurse—until I said we'd sit them out by the windows."

"Mamma got up to an agreement with a woman from New Orleans about Ben Butler and the episode. He noticed it, and—well, I never imagined a man could sit and talk so sentimentally on such short acquaintance."

"Then suddenly she all turned very chilly—and I saw that mamma had her eyes on us. My good ones! Such a frozen glance!"

"Do you think he minded? Not a bit. 'You are going to Astoria,' he said, 'may I visit you there?' and I said 'yes,' real quick, before mamma could snatch her breath."

"Next day and the next he rushed us off in his car, and you wouldn't believe how sentimental he got every time mamma's back was turned."

"On the fourth day—while mamma was taking her nap and writing papa about the awful audacity of people from the West—he actually kidnapped me into his automobile alone and whisked me down the road for ten' he kept repeating. I almost fell out what else he said."

"Maybe it wouldn't have happened so quickly, only I was thinking of poor mamma's feelings. We were generally about fifteen minutes—and I returned equipped with more I had met only four days before."

"Mamma didn't like it at all. She said Mr. Moore appeared to be a gentleman, but what did we know

about him except that he was from a good family? hardly asked when the waiter brought him straight to our table. Well, you ought to have seen mamma! this stranger? I heard her tell papa, and mamma can hand his little of a shining new double eagle.

# How I Won First Prize With My Figure "My Muscles and My Perfect Health."

**A Valuable Lesson for All Young Women, by Miss Marie Spitzener, Three Years Ago a Hopeless Consumptive, Who Has Just Won the Highest Honors in the National Physical Contests**

WHEN Miss Marie Spitzener, of New Haven, Conn., carried off the first prize and all the highest honors a few days ago in New York City at the national physical contests for women, she accomplished something which three years ago would have seemed absolutely impossible in her case.

Three years ago she was an object of loving sympathy for her friends, a hopeless invalid, claimed by consumption for an early grave.

A few days ago the judges in the national physical contests for women accorded her the first prize for perfect physical development, which includes grace, poise, strength and a perfect figure; for perfect health, which includes a clear skin and a rosy complexion; and for physical endurance, which includes supremacy in the athletic games which have aided in the splendid development of the twentieth century girl.

On this page to-day Miss Spitzener tells how she succeeded by the most simple methods (impossible to reading a consumptive's grace and in perfecting her health and her figure too. Her methods afford a valuable lesson to all young women who would like to be as graceful, happy, healthy and good to look upon as Miss Spitzener herself.

BY MARIE SPITZENER.

ANY young woman who tries can very easily become as perfect in health and figure as I am. It is a simple matter of following common sense rules of daily exercise. There is no secret whatever about being able to rid yourself of many ailments to which the lungs and digestive organs play an important part, and to be utterly free from bad habits, languor, dyspepsia and a hundred other minor ills to which women are subject.

Wise, to look at me now, would believe that three years ago I was slowly dying of consumption! One doctor after another treated me and at last they heartily agreed that there was no hope. I had wasted away until I weighed only eighty-seven pounds, and each day I grew weaker. Nothing, it seemed, could save me. Then it was that my brother, Max, startled mother and me all of a day by saying that if the doctors could not save me he would, as a last resort, try another kind of cure. He would try athletics.

You may guess that he had had work to persuade my mother to consent. Everyone said how cruel it was to subject a dying girl to such treatment.

"All right," said Max. "She's my sister."

Exercise 8—For a Perfect Carriage and to Make the Shoulders Firm, Alternate the Arms in This Position.

body movement—working hands and arms at full length over the head, side to side and forward and backward, giving every muscle full play. Thus I gradually arrived at the exercise with dumbbells of from one pound to two pounds in weight, with the same movements.

I want to tell women who try this exercise not to quit because their muscles ache at first. The agony I endured with the stiffness of arms and legs and about

der at first was worse than rheumatism. My muscles had been resting for want of use. The exercise is all we put on the rest so that after the first two or three times the muscles work easily and one feels no distress whatever.

So from one stage to another I traveled, gradually increasing the hand and arm drill and the body movement until I could work for three-quarters of an hour or even an hour and a quarter without a stop.

My ambition now led me to the horizontal bar. Of all exercises except boxing it is the one I learned to love most.

My love of boxing came about naturally enough from ambition that led me to equal athletic feats of the young men who came from my brother's gymnasium. Really, no other

exercise for any girl can be imagined. To foot and arm work, the constant play of muscles required in boxing are all valuable, and it really is a good thing to feel that you can defeat yourself if need be.

I had been under my brother's care for two years and was now cured of consumption, and a fairly healthy girl, except for occasional slight sick spells, when Mr. S. Ryder, the president of the New Haven Physical Culture Society, took up my training. He believed that my time could be so developed and my capacity for endurance so extended that I could perform a creditable example of the perfect woman. You know of course that the progress of the young men who came from my brother's gymnasium. Really, no other

tain set rules of diet. For instance, I eat no breakfast, but instead, take a long walk of three or four miles. For luncheon I eat a sandwich with Graham bread and a glass of milk.

The arm exercise (Figure 8) and the shoulder, back and hip exercise (Figure 9), are each simple and easy, the latter one consisting of a backward bend of the shoulders and a hip movement almost simultaneous and throwing the whole weight of the body backward, the right hand being clasped in the left with the palms turned upward.

From these exercises can be accomplished in fifteen minutes of work each morning. I believe that if these suggestions are faithfully followed my sister women will be able to accomplish as much and perhaps more than I did.

Altogether my measurements do not yet quite compare to the requirements for the most perfect figure. I have hopes that by further adhering to the exercises given on this page I can approach as close to perfect physical proportions as it is possible for me to do. Three years ago I was a body frail without any figure at all.

Today I have a figure which almost any young woman might be proud of. By following the exercises described herewith you can easily accomplish as much and even more than I have done. I am now sixteen years old, height 5 feet 2 1/2 inches, weight 120 pounds, neck 12 1/2 inches, chest normal 34 1/2, contracted 31 1/2, expanded 34 1/2, forearm 10 1/2, wrist 8 1/2, upper arm, relaxed, 21 1/2, upper arm, flexed, 21 1/2, lower arm, relaxed, 15, upper arm, relaxed, 15, upper arm, flexed, 15, upper arm, relaxed, 15, upper arm, flexed, 15.

The hand callisthenics are slightly different.

The exercise illustrated in Figure 5 has the valuable property of strengthening the muscles of the arms and the legs by the pressure of the hands over the head and downward, until the hands touch the

floor, the body making a complete circle.

The waist line movement exhibited in Figure 6 simply means placing the hands on the hips and swaying the body to and fro. This has the effect of making the waist supple and the hips slender.

There are several valuable floor movements. Of these I suggest lying at full length face downward, as I have indicated in Figure 7, with the body raised about three inches from the floor and supported solely by the arms and the flat of the hand. Difficult? Not at all. Any girl in the world can stay in that position for two or three minutes after a little practice.

The arm exercise (Figure 8) and the shoulder, back and hip exercise (Figure 9), are each simple and easy, the latter one consisting of a backward bend of the shoulders and a hip movement almost simultaneous and throwing the whole weight of the body backward, the right hand being clasped in the left with the palms turned upward.

From these exercises can be accomplished in fifteen minutes of work each morning. I believe that if these suggestions are faithfully followed my sister women will be able to accomplish as much and perhaps more than I did.

Altogether my measurements do not yet quite compare to the requirements for the most perfect figure. I have hopes that by further adhering to the exercises given on this page I can approach as close to perfect physical proportions as it is possible for me to do. Three years ago I was a body frail without any figure at all.

Today I have a figure which almost any young woman might be proud of. By following the exercises described herewith you can easily accomplish as much and even more than I have done. I am now sixteen years old, height 5 feet 2 1/2 inches, weight 120 pounds, neck 12 1/2 inches, chest normal 34 1/2, contracted 31 1/2, expanded 34 1/2, forearm 10 1/2, wrist 8 1/2, upper arm, relaxed, 21 1/2, upper arm, flexed, 21 1/2, lower arm, relaxed, 15, upper arm, relaxed, 15, upper arm, flexed, 15, upper arm, relaxed, 15, upper arm, flexed, 15.

The hand callisthenics are slightly different.

The exercise illustrated in Figure 5 has the valuable property of strengthening the muscles of the arms and the legs by the pressure of the hands over the head and downward, until the hands touch the

floor, the body making a complete circle.

The waist line movement exhibited in Figure 6 simply means placing the hands on the hips and swaying the body to and fro. This has the effect of making the waist supple and the hips slender.

There are several valuable floor movements. Of these I suggest lying at full length face downward, as I have indicated in Figure 7, with the body raised about three inches from the floor and supported solely by the arms and the flat of the hand. Difficult? Not at all. Any girl in the world can stay in that position for two or three minutes after a little practice.

The arm exercise (Figure 8) and the shoulder, back and hip exercise (Figure 9), are each simple and easy, the latter one consisting of a backward bend of the shoulders and a hip movement almost simultaneous and throwing the whole weight of the body backward, the right hand being clasped in the left with the palms turned upward.

From these exercises can be accomplished in fifteen minutes of work each morning. I believe that if these suggestions are faithfully followed my sister women will be able to accomplish as much and perhaps more than I did.

Exercise 2—To Cultivate Grace and Perfect Poise, Raise the Arms Together, at the Same Time Moving the Feet Forward Alternately.

anyway. Athletics worked poison out of my system. I'll take a chance on results." The next day he took me to the gymnasium and I began. The first exercise was teaching me how to breathe. My experience taught me that last long trouble and asthma, arise not only from foul air, but want of knowledge how to breathe properly—the breathing from the lower lungs instead of from the upper nasal passages. The one way to breathe is to act as though you were snoring.

This infuses the lungs. Thus my brother taught me how to breathe from the lungs for ten minutes every day—long, deep breaths expanding the chest and lungs, forcing the lungs to do extra work until all the poison had been worked out of them.

Then I began to put on strength and flesh and eat a little better than I had done in years.

It was not until I was able to work for many minutes without the slightest effort that my brother began the callisthenic exercises. My first work was the free

Exercise 9—To Develop the Chest, Throw the Shoulders Back Like This, With the Hands Behind the Back, Palms Turned Upward and Left Hand Clapping Right and Breathe Deeply.

Exercise 6—Swing the Waist, Make the Waist Muscles of the Stomach and Suppleness of the Back.

Exercise 5—The Sweeping Circular Bend to Develop the Arm and Leg Muscles.

Exercise 4—To Gain Gracefulness and Suppleness and to Strengthen the Back, Stand in This Position and Swing the Extended Arms as Far Around on Each Side as Possible.

Exercise 3—To Gain Gracefulness and Suppleness and to Strengthen the Back, Stand in This Position and Swing the Extended Arms as Far Around on Each Side as Possible.

Exercise 2—To Cultivate Grace and Perfect Poise, Raise the Arms Together, at the Same Time Moving the Feet Forward Alternately.

Exercise 1—Extend the Arms at Full Length to Right and Left, Forward and Upward, to Make the Arms and Shoulders Strong and Beautiful.

Exercise 1—Extend the Arms at Full Length to Right and Left, Forward and Upward, to Make the Arms and Shoulders Strong and Beautiful.

Exercise 1—Extend the Arms at Full Length to Right and Left, Forward and Upward, to Make the Arms and Shoulders Strong and Beautiful.

# LIFE IN A NURSERY

**How a Real Life  
Reproduction  
of the Celebrated  
Novel Has  
Been Revealed in  
the Kidnapping  
of Baby  
Reagen By  
His Own  
Mother-  
Nurse**

"Suddenly as his little hand reached for Mrs. Reagen's skirt he gurgled delightedly for the first time: 'Mamma, mamma.'"  
"Goldie, the real mother, had dropped to her knees on the floor and was weeping bitterly."

"I am Mrs. George Howard Reagen," she said, boy to that of the nurse. Then he walked about "We live in Alton, Ill. We have no children. If the room, reflecting deeply, only to return and would be the happiest day of our lives if we had found the examination of the two faces. At length a little darling like yours. What is your name, he said."

"Goldie," said the young mother. "Goldie Yell." As he made this remark he stared so steadily at the nurse that she felt certain his mind was not easy on the subject. But Goldie had grown to be very fond of Mrs. Reagen. She noticed the happiness the child had brought to that lonely house, and was loyal to her mistress. She avoided every possible word or act that would arouse any suspicion in Mr. Reagen's mind that she was not only the child's nurse, but its mother also.

"You poor dear," said Mrs. Reagen. "But your child shall have the best of homes. I will adopt Mrs. Yell."

"Oh, I couldn't bear to be separated from him," said Goldie.

**Two Mothers of One Child.**

"You need not be—now," said Mrs. Reagen, reassuringly. "You shall come with him to my home. My husband will be delighted."

The young mother said she would think it over. Mrs. Reagen called again the next day, and the next she brought beautiful new clothes for the baby. She won the heart of Goldie completely. Mrs. Reagen was very urgent. Finally, with wet eyes as she clasped her baby to her bosom, the young mother yielded.

Mrs. Reagen took mother and child to a hotel, where she left Goldie, and with the child in her arms, took the train for her home in Alton, Ill., leaving from the mother she said:

"Do not forget our understanding. I will send you money to follow me soon. You are to tell my husband that you were my nurse in St. Louis when the baby was born. If he knew the child were not our own he would not live with us twenty-four hours."

A few days later Goldie was again with her child in Mrs. Reagen's home in Alton, and no longer as its mother, she wore the white apron and cap of a nurse. Mr. Reagen had received a welcome telegram in Cincinnati, and on his arrival home this was the happy situation that greeted him. His wife explained that she had been able to reach her Cincinnati sister in time. The baby had been born in St. Louis, where she had been nursed by Goldie Yell, whose own child she had died a few days before.

Mrs. Reagen was overjoyed at the living presence of a son and heir. He played with it hours at a time. It was christened for him—George Howard Reagen. After a while he began to notice the unusual fondness of the nurse for the child.

Little George had just learned to walk a few days when his wife was not in the nursery steps, but he had been backward in learning to be held repeatedly from the face of the little nurse, who was the slightest words. When Mrs.

**White-Capped Nurse to Her Own Child.**

Mr. Reagen being away, she wanted to starve with the baby.

"No guest could be more welcome at our house," said Mrs. Reagen.

"No, I will not be a nurse," said Goldie. "Although Mr. Reagen is away, none of the neighbors might think it strange. I will be little and cap of a nurse. Mr. Reagen had received a welcome telegram in Cincinnati, and on his arrival home this was the happy situation that greeted him. Goldie Yell, the Pretty Nurse, Who Kidnapped Her Own Child.

MOTHER love, which, when she places her baby to her heart and all its well with them both, evince her whole being to Goldie's health and happiness, and when some unfortunate separates them, then their face with grief and how her shoulders—mother love is just now the theme of a real life drama as powerful as that which three generations of novel readers and playgoers all over the civilized world have known by the title of "East Lynne."

You will remember that in Mrs. Henry Wood's novel of that name a wayward wife and mother, supposed to be dead by the husband and father, who has taken another wife, returns to disprove as governess of her own children.

So impressive is the cry of her heart for her little ones, now thrown on the tender mercies of a step-mother, that she welcomes the long ordeal of deceit and suppression of her natural emotions that it is inevitable while she lives undiscovered under the same roof with her children and her former husband.

This deepest of human passions, familiar alike to rich and poor, high and low, so powerfully depicted, made "East Lynne" a household word. Now comes its parallel in real life, with features which add another to many evidences that truth is indeed stranger than fiction.

First, there are two pathetic little stories to relate. In the city of Alton, Ill., Mr. and Mrs. George Howard Reagen lived in comfortable circumstances. They were childless, and both eagerly desired a little one to be their very own and to share their lives. It was that Mrs. Reagen be-

Little George Howard-Rowe-Reagen.

Mrs. George H. Reagen, Who Confesses that the Baby Was Not Hers.

Reagen, came in, the child, with arms outstretched the claim of "Kidnapped!" "My baby has been kidnapped," by its nurse, Mrs. George H. Reagen, who confessed that the baby was not hers. "My baby has been kidnapped," by its nurse, Mrs. George H. Reagen, who confessed that the baby was not hers. "My baby has been kidnapped," by its nurse, Mrs. George H. # TO WINTER WEAR

By MRS OSBORN  
CREATOR OF FASHIONS FOR  
THE FASHIONABLE WOMEN  
OF AMERICA.

Quality of More  
Importance Than  
Quantity In the  
Matter of Gown-  
ing

I WANT to say a word to my readers on the subject of quality in dress-making for it is a subject which touches us all very nearly and dearly. Ten years ago \$100 for a gown was considered a large price, and several gowns could easily be procured for that sum. Under \$50 is not at all an unusual price to pay for practically the same gown. There has been and is a steady increase in the cost of dress. Women pay over a thousand dollars for some of their gowns and the price \$200, which I have just mentioned, is considered really a modest one for some "modish" costumes. The cost of dress has just doubled in Paris and has enormously increased all over Europe. Prices there are better than prices here. The sum of this little talk is that a woman will be obliged to limit her winter wardrobe. If she hangs to be strictly a mode, to just a few gowns, and those to almost one color scheme. That should be black, as being the least conspicuous of colors; always smart in color and a color easy to make over and alter to suit the whims of style and circumstances. Black cloth is invariably the smartest thing of which to make a dress for morning wear when shopping or walking. I suggest the selection of an afternoon gown, and that a smart blouse be planned for afternoon service to be worn with the morning suit. Black cloth will make it look very suitable for afternoon wear, but it will be, of course, more simply made than a gown intended for afternoon wear only.

When only gowns are fitted in number I would suggest the dress skirt where practicable. The short skirt can be worn with a certain amount of propriety at all occasions, while a long skirt is only suitable for house or carriage wear. The short skirt always looks smart if well cut and hung, but the long skirt for walking purposes never looks anything but untidy and out of place.

To Create a Modish Gown Cheaply.  
This does not mean that to long skirts will be worn upon the street. Paris has sent over a number of such models, but they are not practical.

Don't have a pleated skirt made. Many people will wear them, but they are not the smartest cut of skirt, and for one whose dress must last a long time, they are to be avoided. The circular skirt is never smart, as it takes time to make, and the pleated variety is more economical as well. The almost seamless circular made up of long skirts is less practical than the long dress with the circular with a coat seam. The former cut skirts on the sides need necessitating a constant taking up or short, tight or loose. It is practical, the skirt, which is smarting and not sitting in the afternoon and will not change its line as soon as a bodice will.

If an afternoon gown can be afforded, velvet is the best material to procure, and, if that proves too heavy, crepe-de-chine should be the choice. It goes without saying that the former fabric will outlast the latter and give better service. It is more practical for the purpose and perhaps as effective as crepe-de-chine for afternoon wear.

A Bewitching Little Trick in Economy.  
I think, however, that a simple and attractive house gown of crepe-de-chine, or some soft material suitable for the house, would prove a much better investment. It could be made so as to take the place of a theatre as well as a house gown and would be less expensive than a regular calling gown, and so save money for a smart blouse to be worn in the afternoon with the morning skirt. Of course the blouse should be white and just as dainty as the materials and workmanship make it.

For evening wear I think a black net the most serviceable material of which to make a gown. An evening gown of black net could be made with a round bodice or the draped one, or in some variation of the princess dress. Its making is so simple that even a very inexperienced maker could make it. An evening gown of lawn and very original style is shown in the illustration made up of very modish.

The morning gown shown in Figure A would be particularly pretty made of beaute or velvet. In cloth the lace insert on the bodice could be omitted.

On each side of the front of the blouse, below a round collar of embroidery, are three groups of three tucks each, and two insertings of lace. Two long tabs of embroidery down each side of the front terminate a little above the belt and are decorated in the top with gold-colored lace of a small round yoke formed of rows of narrow Valenciennes lace. The embroidered collar is attached and forms one piece with the shoulder straps. Medium full sleeves are attached to the armholes and fastened to an embroidered band at the elbow, which forms a cuff above one of the narrow rows of lace from a small collar which is gathered along the front seam.

On each side of the front of the blouse, below a round collar of embroidery, are three groups of three tucks each, and two insertings of lace. C—A Charming Afternoon Gown of Plum-Colored Cloth.  
D—My Little Jacket Bodice for a Dinner Gown.

on each side, narrowing as it runs from the armhole toward the belt, rather than the straight line toward the belt. The armhole is made full length, the straight line toward the belt. The armhole is made full length, the straight line toward the belt. The armhole is made full length, the straight line toward the belt.

A circular skirt may be made in exactly the same fashion, only that the waist fullness at the top should be gathered in double or triple rows of gathers or else fitted to the hips with pin tucks.

A very effective model of an afternoon gown in crepe-de-chine is shown in figure B. It is in a popular shape of pencil coat and the bodice is made with a rose much deeper in the front than in the back and pointed at both points. The bodice is bordered with a fold of pique-colored velvet, in deeper shade, which is wider on the shoulders and narrower where the side runs to the front and back. The bodice is draped over a fitted lining, with the folds of the drapery turned upward. The skirt is put on full in the armhole and along the underarm seam, and the folds at the bottom are finished in the back with a girdle piece.

A three-quarter sleeve of chiffon is draped over with set and with buttons of response lace headed by little sat frills. Both skirt and yoke are covered with response lace, which is put on in three little ruffles across the bottom of the yoke front.

Note the Attractive, Trim Little Coat.  
Figure C shows a very good model of a gown for afternoon wear. It is not too dressy for the morning and quite dressy enough for evening purposes. It is of plum-colored cloth made with a short coat. This coat is covered with the three style, with loose front and a fitted lace attached to the bodice. A rather deep round collar is headed with narrow silk satin, and comes in a point in front. The back, sides and bottom of the front are finished with a velvet fold that runs to a point at the lower edge of the velvet folds, and between the inner folds of velvet are two bands of lace.

Figure D shows a very good model of a gown for afternoon wear. It is not too dressy for the morning and quite dressy enough for evening purposes. It is of plum-colored cloth made with a short coat. This coat is covered with the three style, with loose front and a fitted lace attached to the bodice. A rather deep round collar is headed with narrow silk satin, and comes in a point in front. ## The Washer that Works Itself

HAVE you not running water in your house? Well, if you have enough pressure to run a faucet, you can run a washer without any help.

You can put down the clothes into the tub and let our new Self-Working Washer do the rest.

I know this sounds too easy and too good to be true. But it is true, every word of it. Here is the proof that it is true.

I told you one of these Self-Working Washers to your own house, on a month's free trial.

I will pay the freight out of my own pocket and I will make it do all your washing without any cost to you.

## —and Pays for Itself

And I'll take my pay for it out of what it saves you. Not a cent! I say it will pay for itself. If you don't believe it, I'll give you a free trial.

Remember this: If you don't believe it, I'll give you a free trial. If you don't believe it, I'll give you a free trial. If you don't believe it, I'll give you a free trial.

And I'll take my pay for it out of what it saves you. Not a cent! I say it will pay for itself. If you don't believe it, I'll give you a free trial.

Remember this: If you don't believe it, I'll give you a free trial. If you don't believe it, I'll give you a free trial. If you don't believe it, I'll give you a free trial.

And I'll take my pay for it out of what it saves you. Not a cent! I say it will pay for itself. If you don't believe it, I'll give you a free trial.

# SOLVING AT LAST THE PIKE'S PEAK MURDER MYSTERY

**How Another Brutal Crime Revealed the Identity of the Murderer of Mrs. Bessie Bouton, Who Lured His Beautiful Victim Far Up the Colorado Mountain Side, Shot Her to Death, Poured Benzine Over the Body and Set It Afire.**

A TEMPTED murder to shield the slayer of Bessie Bouton, whose charred body was found in Cutler's Canyon below Pike's Peak, Oct. 12, months ago, has produced the opposite result. The fresh crime, less than ten months later, planned with devilish cunning in a way that would have obliterated all traces of it, is believed to be the same as the starting point for the familiar theory that "murder will out," for it supplies a complete identification of Bessie Bouton's

when, with proof that he is now hiding within reach of Colorado justice. Almost any day now the police may drag Milton Franklin Andrews, alias William C. Ellis, to the spot in Cutler's Canyon where he shot Bessie Bouton and returned a few days later to dress the clothing upon her half-frozen body with benzine and set it afire, and give him an opportunity to confess that ghastly and mysterious murder.

The clothing and the body of the murdered woman were so far destroyed by fire that only two gold-filled teeth served to identify the victim. It was some weeks before it was positively known that she was Bessie Bouton, of Syracuse, N. Y., who had lately been seen in Colorado Springs.

The murderer left no trace of himself. The only person against whom suspicion at length rested was a freshly dressed gambler known as Milton Franklin, in whose hands the body of Bessie Bouton had been found. He was known to have been in the East. He was known to have been in the East. He was known to have been in the East.

When the body of the murdered woman was found, it was in a state of great decomposition. The clothing was so far destroyed by fire that only two gold-filled teeth served to identify the victim. It was some weeks before it was positively known that she was Bessie Bouton, of Syracuse, N. Y., who had lately been seen in Colorado Springs.

The murderer left no trace of himself. The only person against whom suspicion at length rested was a freshly dressed gambler known as Milton Franklin, in whose hands the body of Bessie Bouton had been found. He was known to have been in the East. He was known to have been in the East. He was known to have been in the East.

He and his beautiful companion—Mrs. Augusta Howard, member of the famous Colorado gang of swindlers—lured William C. Ellis to a cottage they had rented at much that he resolved to break away from his life of crime. But these revelations showed Ellis so the police saw at once that Curtis had been deceived by the woman, and seemed to have had an inkling of this state of mind, for Ellis found himself being closely watched.

When Ellis had fought his way free from the street, the man and woman, in their haste to get away from the town, left all their murder paraphernalia and most of their extensive baggage in the cottage later to corroborate the remarkable tale their victim told in the hospital.

Ellis told how, a few months back, he had met William Curtis and his charming companion—the Howard woman—in an establishment in the Howard woman's good estate. Curtis represented that he had valuable stables and contract contracts in America and proposed that Ellis accompany him back in that country.

Like a Fly in a Spider's Web. In the meantime Ellis was becoming deeply infatuated with the Howard woman. His friends warned him that the pair were adventurers of the worst type, but he could not resist the woman, to whom he gave valuable presents of jewelry, more than he could Curtis, who had wonderful magic powers, rendering those who upon whom he exerted them as helpless as a fly in a spider's net.

So when Curtis and the Howard woman left Australia, Ellis was with them, having deserted his wife and children, and being completely under the influence of the adventurers.

On shipboard Ellis discovered that Curtis had used the name of Brush, and also that he was with them. He explained that he had once shot a man in a Chicago saloon, and that he was now in the United States, and for his wife's sake their invitation to lunch next day at the hotel was obliged to use false names at Berkeley cottage.

It was while he was seated at the table that he was attacked by the man who was supposed to have murdered Mrs. Bessie Bouton. In fact, he was the murderer—woman with a revolver. Ellis's captors had been related, also the confessed to him that he was the murderer. These confessions seemed to be made with a view to convincing Ellis that he was a gambler, and that he was now in the United States, and for his wife's sake their invitation to lunch next day at the hotel was obliged to use false names at Berkeley cottage.

When the two men were waiting on the beach Ellis had reason to believe that he was walking along ahead of Curtis, but he heard a pistol shot and a bullet whizzing past his head. Turning he saw a smoking revolver in Curtis's hand. The latter made light of the incident, saying that the woman had accidentally discharged.

On their arrival at San Francisco Curtis assumed the name of Frank. He represented the Howard woman as a noble Irish wife. While Ellis still believed Curtis to have designs upon his life, he was still in the woman's power, owing to his infatuation. But he would not step at the hotel with them.

Curtis was not ready to go to New York, their proposed destination. He wanted to remain a while in San Francisco. But he wanted a quiet place. Suggesting nothing then, Ellis loaned him \$200 with which to rent a second cottage in Berkeley near a church. It was a furnished cottage, and into it the man and woman moved without delay.

Ellis remained at his hotel. For three days he did not see his fellow voyagers, but they called and together they visited several places of amusement in San Francisco. Ellis wanted to have their photographs taken together, but Curtis promptly declined for himself and the woman. But they allowed themselves to be weighed and measured. On parting, Ellis accepted their invitation to lunch next day at the hotel. From tip to tip of fingers, 6 feet 2 1/2 inches; measures 34 1/2 inches around neck; upper chest, 34 1/2 inches; lower chest, 31 inches; hips, 34 1/2 inches; waist, 28 1/2 inches; breadth of shoulders, 15 1/2 inches.

His hair is dark and wavy, his eyes are light, his nose is straight, his mouth is small, his chin is pointed, his ears are large, his hands are large, his feet are large, his fingers are long, his nails are long, his teeth are white, his skin is fair, his complexion is ruddy, his hair is dark, his eyes are light, his nose is straight, his mouth is small, his chin is pointed, his ears are large, his hands are large, his feet are large, his fingers are long, his nails are long, his teeth are white, his skin is fair, his complexion is ruddy.

When their baggage was opened the police saw at once that Curtis had been deceived by the woman, and seemed to have had an inkling of this state of mind, for Ellis found himself being closely watched.

When Ellis had fought his way free from the street, the man and woman, in their haste to get away from the town, left all their murder paraphernalia and most of their extensive baggage in the cottage later to corroborate the remarkable tale their victim told in the hospital.

Ellis told how, a few months back, he had met William Curtis and his charming companion—the Howard woman—in an establishment in the Howard woman's good estate. Curtis represented that he had valuable stables and contract contracts in America and proposed that Ellis accompany him back in that country.

Like a Fly in a Spider's Web. In the meantime Ellis was becoming deeply infatuated with the Howard woman. Ellis's captors had been related, also the confessed to him that he was the murderer. These confessions seemed to be made with a view to convincing Ellis that he was a gambler, and that he was now in the United States, and for his wife's sake their invitation to lunch next day at the hotel was obliged to use false names at Berkeley cottage.

The Girl's Body Was Stripped of Its Clothing, Roughly Thrown Across a Fallen Tree, and Then the Murderer, Having Lighted a Pile of Brush Under the Head, Saturated It With Benzine in Order That No Possible Trace Might Serve to Identify the Body.

There was nothing left to be done but to Australia, as the murderer of Bessie Bouton. Never was a murderer hunted in better-described, never one with more damning possibilities to mark him in a month. They were seen in Denver, but there they dressed gang, and that he was preparing, covered their tracks. But it is now known that this same woman was with Franklin some time after the murder of Bessie Bouton, and that they stayed right in Denver while the search was being made. This discovery leads the detectives to believe that Franklin may now be obtaining the same tactics that he has returned to San Francisco and is hiding there where his presence ordinarily would be least suspected.

But how can a murderer so well identify

# SUNDAY AMERICAN JOURNAL-EXAMINER PATTERNS.

How to Obtain the Complete Patterns and Designs for a Little Girl's Russian Blouse Dress and a Little Boy's Blouse Suit Which You Can Very Easily Make at Home Yourself.

TWO very pretty designs for a little girl's Russian blouse dress and a little boy's suit are shown on this page to-day. Patterns and complete directions for making these charming little suits, if home yourself can be obtained by simply filling in the blanks printed herewith and mailing with ten cents in money or stamps for each pattern desired to "Children's Suit Patterns," P. O. Box 260, New York City. Patterns and directions will be sent postpaid by return mail.

This Russian blouse dress, No. 200-2002, is extremely popular because it is one of the most suit and styles for 1915.

Mail this filled in blank and ten cents in money or stamps for the little girl's Russian blouse pattern.

Sunday American Journal-Examiner Patterns  
Girls' Russian Blouse  
No. 200-2002  
Age \_\_\_\_\_ years  
Name \_\_\_\_\_  
Street and Number \_\_\_\_\_  
City \_\_\_\_\_ State \_\_\_\_\_

The little dress need not necessarily be made exactly like the design shown herewith. The box pleat in front may be adorned with buttons, or with an embroidered design in some contrasting color.

Almost any material may be used in making this dress. A very pretty idea would be to use blue serge, having the stitching and buttons in red. This is an extremely simple little dress to make, and has a style and attractiveness that is not found in all of the plated models.

Pattern No. 200-2002, for the little girl's Russian blouse dress, comes in four sizes, 4 to 10 years, and for a medium size requires four yards of one-half inch material.

The little boy's suit, pattern No. 201-2007, will prove a very popular design with mothers who follow their own fashion.

This design, like the girl's blouse dress, is extremely simple and is a very practical costume. The blouse has a simple yoke with small box pleats extending from beneath the pleats. The belt, which gives the costume its effect, may be of the material of which the blouse is made, or of leather.

This suit is in serge, 6 to 10 years, and will require a very serviceable one.

Pattern No. 201-2007, for the little boy's blouse suit, comes in five sizes, 2 to 6 years, and for a medium size requires two yards of one-half inch material.

When making patterns, be careful to use the correct size. Omissions for patterns in other sizes are given above cannot be omitted.

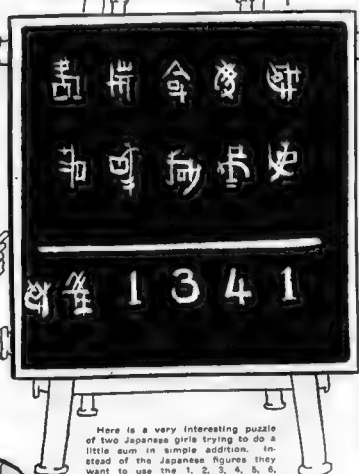

Mail this filled in blank and ten cents in money or stamps for the little boy's blouse suit pattern.

## CAN YOU DO THIS JAPANESE SUM?

BY SAM LOYD

Here is a very interesting puzzle of two Japanese girls trying to do a little sum in simple addition. Instead of the Japanese figures they want to use the 1, 2, 3, 4, 5, 6, 7, 8, 9 and 0 used by American boys and girls. Using every one of the ten figures just given, can you substitute them for the two rows of Japanese figures to be added up so that in the answer the four figures 1, 3, 4, 1, shown on the third line will not have to be changed and so that there will be two other figures in place of the two Japanese signs at the left of the third line?

## A "TRUST" TO LOWER PRICES

The three leading magazines in this country have formed a "trust"—to lower prices, not to raise them.

The three magazines are the Cosmopolitan, the greatest of the 10c. illustrated monthlies, which is now published by the Hearst organization (the most successful publishing house in America), The Review of Reviews, the principal monthly review in this country, and the Woman's Home Companion, the foremost monthly journal for women. These three periodicals are offered together at a price so greatly reduced as to be astounding.

Every Fall the various magazines enter on a costly competition in the work of getting new subscribers—each spending great sums of money in advertising. This year the three leaders have decided to work together and by using one combined advertisement will effect a great saving in their bills. You get the benefit—for the money thus saved goes to lowering the price of subscription and alone makes possible the great half-price offer detailed below.

On receipt of only \$2.50 we will send you for one year these three magazines—  
**Cosmopolitan Magazine** (Regular Price, \$3.00)  
**The Review of Reviews** (Regular Price, \$3.00)  
**Woman's Home Companion** (Regular Price, \$3.00)

Regular Price, \$9.00  
**OUR OFFER:**  
**The 3 for \$2.50.**

**Remember:** You get the three magazines—each the best in its own line—for just half the regular price. Magazines will be mailed to separate addresses or to one address—just as you wish.

**Please Note: This offer is limited. If you want the benefit of its extraordinary values send in your order at once—to-day—NOW.**

**Put an X opposite the name of the person sending in this order, so that we can acknowledge receipt of the money**

**Fill Out and Mail This Coupon To-Day:**

## There Are Two Kinds of Charity

There Is the Charity of the Heart, There Is the Charity OF THE POCKETBOOK.

It Is the Charity of the Heart That Keeps Our Civilization Going AND GROWING

"The greatest of these is Charity."

IN this world the most beautiful thing is CHARITY which gives without hope of reward or return, simply for the love of giving, and for the love of other human beings.

All charity is beautiful, necessary, that which comes from abundant wealth spasmodically sympathetic, and that which comes from the very heart of the poor helping each other.

If anything can make the eye in the needle wider for the Croesus it is the charity which marks the close of his life when his money has been accumulated.

And if there is anything that gives us hope for the future of the human race, confidence in the innate goodness of human beings, it is the wonderful endless charity that poor people show to each other, and that the world never hears of.

It is because there is so much charity NEVER HEARD OF that we write today of the two kinds of charity and illustrate them in this picture.

The woman is put out of her home. Furniture is on the sidewalk, the children are bewildered and frightened—and HUMILIATED; humiliation is saddest to the poor.

Help comes at once. Poor people passing the door give their pennies. The rich woman-driving by sends a footman to help as she looks out sympathetically, afraid that what she has seen is going to spoil her pleasure for the evening.

The woman, the coachman and the footman drive away. It begins to get dark, the sun is going down behind the tenement house roofs—the sun sets earlier on the tenement streets than it does on the wide park or the beautiful country.

In the darkness, REAL CHARITY COMES OUT FROM THE TENEMENT HOUSES NEARBY.

The mother whose rooms are already too crowded with scanty furniture and plentiful children—comes down with

her husband and a neighbor. The woman put on the street by a rich man IS PUT BACK UNDER A ROOF BY A POOR MAN.

The dinner that is none too big for four is made to do for six or eight.

The poor woman and the children that have been rescued from the streets are put in the place of honor. THEY ARE MADE TO FEEL LIKE WELCOME GUESTS, NOT LIKE OBJECTS OF CHARITY, NOT LIKE BEGGARS.

And that is the real charity that makes life possible, keeping the poor and friendless from utter despair in this hard world.

We would not have any man underestimate the charity of the powerful man, rich man.

In all the history of the world we sincerely believe there is no more hopeful sign than the recent tendency of those that are very successful in life to give back to the people the money that they have accumulated in their days of work.

Human beings are not yet advanced sufficiently in government to look after their own interests thoroughly.

The public money is used without stint TO BUILD JAILS, but our foolish ideas will not allow us to use that same money TO BUILD LIBRARIES—ALTHOUGH WE KNOW THAT THE LIBRARY IS THE ENEMY OF THE JAIL AS KNOWLEDGE IS THE ENEMY OF IGNORANCE AND CRIME.

It was real charity and nobility of character that impelled Andrew Carnegie, poor and without education in his youth, to give back to the people in public libraries, and in his splendid establishment of learning at Washington, the millions that he piled up as a successful man.

When old John D. Rockefeller, grief-stricken at the loss of a grandchild, devoted a large sum of money to scientific investigation of children's diseases and their cure, he did a great deal for millions of children and mothers that will live here after his death—the thought was kindly, it should be appreciated to the full.

J. Pierpont Morgan took millions of his money and gave them to establish a lying-in hospital for poor women, an establishment so perfect in its detail, its scientific care of health, THAT THE RICHEST WOMAN CANNOT HAVE IN HER OWN HOME SUCH CARE AS MORGAN GIVES TO THE POOREST WOMAN IN HIS HOSPITAL. The world must recognize in that a beautiful charity, and be glad that the made of spirit impelled Mr. Morgan to do so much for those that need his help.

It would be better if we had reached the point where we had no John D. Rockefellers and no Morgans; on the one hand making millions by control of legislation, and on the other hand giving millions in charity back to those from whom they have taken tens of millions.

But until we learn enough to spend our public money for hospitals and libraries and institutions of learning, we must be grateful that in the brain of the powerful men that take the hundreds of millions from us there is the particular kind of charity that impels them to give a few millions back.

There are the two great kinds of charity—the charity of power of the full purse, which gives freely—easily. That kind of charity is needed, it is the prelude to common sense on the part of the people, the forerunner of real government, free from charity, which will enable the people to do for themselves those things which they now receive as gifts from the hands of the enormous millionaires.

That kind of charity which appears in its millions and tens of millions is well advertised—everybody MUST hear about it.

We talk and ask you to think often of the second kind of charity.

The charity from a hand hard on the palm and grimy with labor on the back, that takes from its pocket a small sum, and almost apologetically gives it to the woman poorer than the giver. That charity is practiced daily on every

block of every city in this country—and in every other country.

It is the charity that sends one poor mother to help another when a child arrives unexpectedly into the world.

It is the charity that brings friends when a child is sick and money is lacking for the doctor and for good food.

It is the charity, YOU MAY BE SURE, THAT GOES MOST SWIFTLY AND DIRECTLY TO BE RECORDED BEFORE ETERNAL JUSTICE, IN THE BOOK WHERE THE NOBLEST ACTS OF MEN ARE WRITTEN DOWN.

Long ago the story was told. In the temple at Jerusalem the rich gave freely, and all the world knew it.

That big giving was good charity.

But the other kind still better was there when the poor widow with torn clothes and a thin hand gave her mite.

"And He looked up, and saw the rich men casting their gifts into the treasury."

"And He saw also a poor widow casting in thither two mites."

"And He said: Of a truth I say unto you, that the poor widow hath cast in more than they all. For all these have of their abundance cast in unto the offerings of God; but she of her penny hath cast in all the living that she had."

That is the charity of which we wish to remind you today.

When you hear that this man has given his millions or that man his tens of millions, for charity, or education, or science—he is glad and GRATEFUL. BUT DON'T FORGET THAT THE REAL CHARITY, THE REAL MILLIONS, are given away by human beings whose names you will never hear, whose kindness and self-denial you will never know of.

IN ACTUAL GIVING OF MONEY, THE CONTRIBUTIONS OF THE POOR TO THE VERY POOR SURPASS IN VOLUME, AS THEY DO IN CHARACTER, all the millions from the givers of large sums.

The poor child is clothed by the poor neighbor, and the poor woman is fed by a poor neighbor, and life is made possible by the charity of the poor to the poor.

# ADVANCES OF SETTING OUT TREES AND SHRUBS IN THE FALL

## GARDENER DOOGUE GUIDES PLANTERS IN SELECTIONS.

This is the third in the series of articles prepared for the BOSTON AMERICAN by our expert, Mr. Doogue, of Boston, Luke J. Doogue.

### HOW TO SELECT And Plant TREES AND SHRUBS BY LUKE J. DOOGUE.

The average person who has a garden or a lawn, and who is desirous of making it more attractive, will find it well to select a few trees and shrubs to plant in the fall. The fall is the best time to plant trees and shrubs, for the ground is not so hard as in the spring, and the trees and shrubs will have a chance to get established before the ground freezes. The fall is also the best time to plant trees and shrubs, for the trees and shrubs are in the best of health, and they will have a chance to get established before the ground freezes.

In the case of planting a tree, the first thing to do is to select a tree that is suitable for the place. The tree should be of a species that is native to the country, and it should be of a size that is suitable for the place. The tree should also be of a species that is hardy, and it should be of a species that is not subject to disease.

With the average person, the most common mistake is to select a tree that is too large for the place. The tree should be of a size that is suitable for the place, and it should be of a species that is native to the country. The tree should also be of a species that is hardy, and it should be of a species that is not subject to disease.

#### High-Ceilinged Tree.

The most common mistake is to select a tree that is too large for the place. The tree should be of a size that is suitable for the place, and it should be of a species that is native to the country. The tree should also be of a species that is hardy, and it should be of a species that is not subject to disease.

#### Plant Immediately.

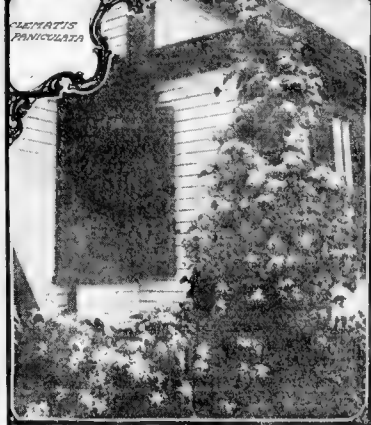

On receiving your order from the nursery, you should plant the trees and shrubs as soon as possible. The trees and shrubs should be planted in the fall, and they should be planted in the best of health.

#### Flowers in Cemetery.

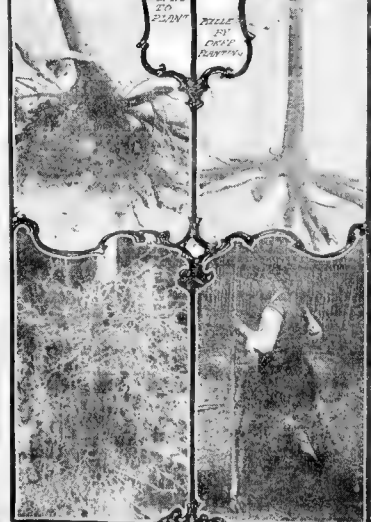

Some people find a preference for all

# Stories of Success in New England--No. 5

## HOW JOHN L. BATES WON HIS WAY TO THE FORE.

Of the stories of New England success, which are appearing in this series, the most striking is that of the fifth Massachusetts Governor, John L. Bates.

By J. Frank Davis.

When I asked John L. Bates to write a story of his life, he said that he did not want to write a story of his life, but he would write a story of his work. He said that he would write a story of his work, and he would write a story of his work.

John L. Bates was born in 1818, in the town of Andover, Massachusetts. He was a member of the Massachusetts House of Representatives, and he was a member of the Massachusetts Senate.

John L. Bates was a member of the Massachusetts House of Representatives, and he was a member of the Massachusetts Senate. He was a member of the Massachusetts House of Representatives, and he was a member of the Massachusetts Senate.

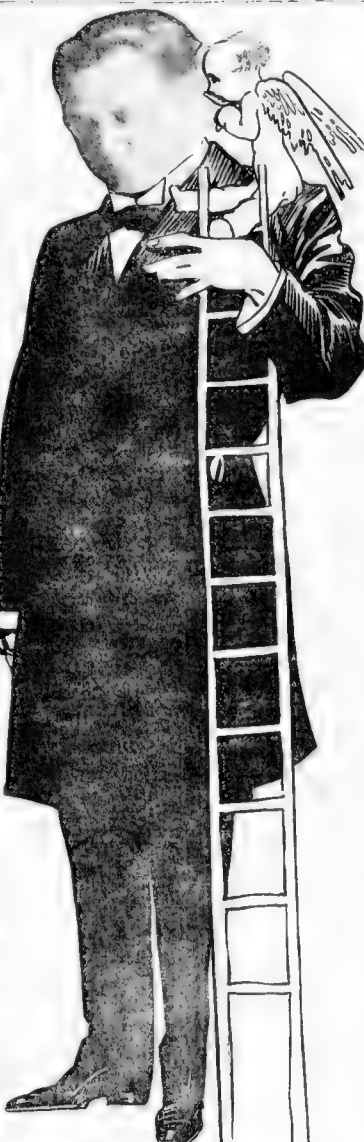

John L. Bates was a member of the Massachusetts House of Representatives, and he was a member of the Massachusetts Senate. He was a member of the Massachusetts House of Representatives, and he was a member of the Massachusetts Senate.

John L. Bates was a member of the Massachusetts House of Representatives, and he was a member of the Massachusetts Senate. He was a member of the Massachusetts House of Representatives, and he was a member of the Massachusetts Senate.

John L. Bates was a member of the Massachusetts House of Representatives, and he was a member of the Massachusetts Senate. He was a member of the Massachusetts House of Representatives, and he was a member of the Massachusetts Senate.

John L. Bates was a member of the Massachusetts House of Representatives, and he was a member of the Massachusetts Senate. He was a member of the Massachusetts House of Representatives, and he was a member of the Massachusetts Senate.

John L. Bates was a member of the Massachusetts House of Representatives, and he was a member of the Massachusetts Senate. He was a member of the Massachusetts House of Representatives, and he was a member of the Massachusetts Senate.

By John L. Bates.

Without hard work, success is impossible. I have had my share of success, and I have had my share of failure. I have had my share of success, and I have had my share of failure.

Without hard work, success is impossible. I have had my share of success, and I have had my share of failure. I have had my share of success, and I have had my share of failure.

Without hard work, success is impossible. I have had my share of success, and I have had my share of failure. I have had my share of success, and I have had my share of failure.

Without hard work, success is impossible. I have had my share of success, and I have had my share of failure. I have had my share of success, and I have had my share of failure.

Without hard work, success is impossible. I have had my share of success, and I have had my share of failure. I have had my share of success, and I have had my share of failure.

### Must Be Unselfish

Without hard work, success is impossible. I have had my share of success, and I have had my share of failure. I have had my share of success, and I have had my share of failure.

Without hard work, success is impossible. I have had my share of success, and I have had my share of failure. I have had my share of success, and I have had my share of failure.

Without hard work, success is impossible. I have had my share of success, and I have had my share of failure. I have had my share of success, and I have had my share of failure.

Without hard work, success is impossible. I have had my share of success, and I have had my share of failure. I have had my share of success, and I have had my share of failure.

Without hard work, success is impossible. I have had my share of success, and I have had my share of failure. I have had my share of success, and I have had my share of failure.

## COURAGE--A BUSINESS ASSET

BY JOHN BRIDEN WALKER.

COURAGE is the most valuable of human assets. It is the asset that makes a man a man. It is the asset that makes a man a man. It is the asset that makes a man a man.

# 100 YEARS From Cat-o-Nine Tails to Humane PRISON Treatment That Works to Big REFORM

BY BEULAH DICKINSON

A century ago, when the first prison was built in this city, the treatment of the prisoners was a cruel and barbarous one. The prisoners were kept in a dark, damp, and filthy cell, and were subjected to the most brutal treatment. They were whipped, and their heads were shaved, and they were kept in chains. The prisoners were not allowed to see the light of day, and they were not allowed to speak to one another. The prisoners were not allowed to work, and they were not allowed to read. The prisoners were not allowed to have any kind of recreation. The prisoners were not allowed to have any kind of food. The prisoners were not allowed to have any kind of clothing. The prisoners were not allowed to have any kind of shelter. The prisoners were not allowed to have any kind of life. The prisoners were not allowed to have any kind of hope. The prisoners were not allowed to have any kind of future. The prisoners were not allowed to have any kind of present. The prisoners were not allowed to have any kind of past. The prisoners were not allowed to have any kind of life. The prisoners were not allowed to have any kind of hope. The prisoners were not allowed to have any kind of future. The prisoners were not allowed to have any kind of present. The prisoners were not allowed to have any kind of past.

The prisoners were not allowed to have any kind of future. The prisoners were not allowed to have any kind of present. The prisoners were not allowed to have any kind of past.

## 24 Years Behind the Bars.

The prisoners were not allowed to see the light of day, and they were not allowed to speak to one another. The prisoners were not allowed to work, and they were not allowed to read. The prisoners were not allowed to have any kind of recreation. The prisoners were not allowed to have any kind of food. The prisoners were not allowed to have any kind of clothing. The prisoners were not allowed to have any kind of shelter. The prisoners were not allowed to have any kind of life. The prisoners were not allowed to have any kind of hope. The prisoners were not allowed to have any kind of future. The prisoners were not allowed to have any kind of present. The prisoners were not allowed to have any kind of past.

## Silence the Real Hardship.

The prisoners were not allowed to see the light of day, and they were not allowed to speak to one another. The prisoners were not allowed to work, and they were not allowed to read. The prisoners were not allowed to have any kind of recreation. The prisoners were not allowed to have any kind of food. The prisoners were not allowed to have any kind of clothing. The prisoners were not allowed to have any kind of shelter. The prisoners were not allowed to have any kind of life. The prisoners were not allowed to have any kind of hope. The prisoners were not allowed to have any kind of future. The prisoners were not allowed to have any kind of present. The prisoners were not allowed to have any kind of past.

## Danderine

GREW EVERY BIT OF IT.  
And we can  
**PROVE**  
IT.

FRED MADAMS.

**\$1000**  
if this photograph and testimonial are not absolutely genuine and unaltered.

**FREE** Don't say you are a miser and not a generous man. We will send you a large sample by return mail. The samples we give are large enough to produce beautiful results, in many cases a being enough to stop bad cases of hair falling and the hair growing again. NOW on sale at all drug stores, three sizes, 25c., 50c., \$1.00 per bottle. KNOWLTON DANDERINE CO., Chicago.

## The Hospital

Thankful are They  
Who Escape The  
Surgeon's Knife

Thousands of surgical operations are performed every year in our great city hospitals upon women afflicted with serious female troubles. Sometimes the operations are successful—often times they are not.

It is safe to say that certainly nine out of ten operations for female troubles might have been wholly avoided.

The most valuable tonic and re-builder of the female organism, the medicine with a record of thousands of cases literally snatched from the operating table, is

## Lydia E. Pinkham's Vegetable Compound

Do not consent to an operation which may mean death until after you have given Lydia E. Pinkham's Vegetable Compound a fair trial. Note what it did for Mrs. Paul Oliver, whose letter follows:

DEAR MRS. PINKHAM:—I was suffering from pains in my side and womb. The doctors said to get well I must have an operation performed, but I would not consent to that.

I heard of Lydia E. Pinkham's Vegetable Compound and sent for a bottle; the first dose did me good, and after taking the first bottle I could sleep all right and I did not have those pains around my womb which I had all the time before. Now I can ride ten miles in a carriage, my color has returned, and I am full of life. I owe all this to the Vegetable Compound.

It has also done wonders for my thirteen-year-old daughter. I will never cease to praise it and recommend it to my friends.

Mrs. Paul Oliver, St. Martinsville, La.

Thousands of women, residing in every city and town in the United States, bear willing testimony to the wonderful virtue of Lydia E. Pinkham's Vegetable Compound. It cures female ills and creates radiant, buoyant female health. For your own sake try it.

Lydia E. Pinkham's Vegetable Compound Cures Where Others Fail

## \$100 Reward!

### A Hundred Dollar Prize Story

One hundred dollars in prizes will be given away each week by the BOSTON AMERICAN to those who solve the mysteries of the "THINKING MACHINE" stories. These stories are the most fascinating and remarkable short, mystery stories that have been produced in recent years.

The first story will start in the BOSTON AMERICAN tomorrow. It is entitled "The Mystery of Cell 13." The story will run in installments through the week until Saturday, when everybody will have a chance to guess how it ends.

The one who guesses the ending first and best will get \$50. The next best guesser will get \$25. The third prize is \$10, and there are three prizes of \$5 each, making a total of \$100. Read the EVENING AMERICAN for full details of this prize series.

"The Mystery of Cell 13" will keep you awake nights wondering how the famous Professor Van Doren, otherwise known as The Thinking Machine, succeeds in escaping from the cell.

## \$100 Reward!

POLITICAL DOINGS OF THE WEEK AS THEY APPEARED TO THE COMIC ARTIST

There is thirteen in the Donovans camp against former Alderman Doyle. Art J. Mayor Wexler, Superintendent of Boro 1, said he was not surprised that Doyle, a leader of the Democratic City committee, said that Doyle promised to support City Clerk Donovan. They say he asked that

## FENWAY PALACE TO CLOSE; BIG DUTY PAID.

Mrs. Gardner Forced to Send \$195,000 Check to the Authorities at Wash. for Her Art Treasures

Mrs. John J. Gardner has sent to the Treasury Department at Washington a check for \$195,000 in payment of the duties on the art treasures which she has imported for the Fenway Palace. Mrs. Gardner expected that these would be admitted free because they were for exhibition. The Treasury Department, however, has decided against it. That she has been compelled to pay the duty is a great loss to her.

The first information given of the payment of duty was through the office of Henry W. Swift, who said the amount was between \$100,000 and \$150,000. Mrs. Gardner, who is in New York, said that she had refused to pay the duty, but that she was now paying it because she was so interested in the work.

It is known that for some time past Mrs. Gardner has been in communication with the Treasury Department in regard to the art. As yet to the latter, however, she has declined to pay the duty until she has been kind of a letter to her attorney. Then she promptly sent the check which was sent at a letter this was the necessary has declined to state.

## KING ALFONSO PICKS AN AERONAUT

King Alfonso of Spain has selected in receiving an aeronaut from a few days ago. Aeronaut was a part of the President's program in connection with the visit of President Loubet. As soon as the king was told that the aeronaut was a part of the program, he was in a great hurry to get a number of the aeronauts. The king decided in a few days when the king visited him.

## Cut This Out and Sign It MUNICIPAL OWNERSHIP LEAGUE.

Ward \_\_\_\_\_ City \_\_\_\_\_

I, the undersigned, enroll myself a member of the Municipal Ownership League of the city in which I reside. I pledge myself to use every honorable effort to bring about the municipal ownership of public utilities. I believe that city lighting plants to supply the needs of the city and the citizens as well as one object to be attained.

The attempt now being made to elect a Legislature which will pass measures permitting the establishment of an electric railway monopoly in Massachusetts and granting exclusive franchises to a favored syndicate shows the necessity of a prompt and concerted movement for public ownership by all citizens, irrespective of party.

Name \_\_\_\_\_

Street Address \_\_\_\_\_

Out this out, sign it and mail it to the Secretary of the Municipal Ownership League, No. 89 Summer Street.

If you desire to take part in the formation of a municipal ownership club in your ward or city, write to the Secretary of the League for blanks and for information as to the best manner of forming a club.

## CIVIC OWNERSHIP MOVEMENT IN FULL SWING.

Public Demand for Complete Control of Public Utilities Constantly Increasing—Doctors Are Joining New League

That the sentiment for municipal ownership is now strong and is growing in force is shown everywhere by the letters that are being received by the Secretary of the Municipal Ownership League, and by the fact that the Board of Aldermen and Common Council have decided to take action on the subject.

When the Boston Commonwealth has decided to take action on the subject, it is a great step forward. It is a great step forward in the movement for public ownership.

The fact that the Boston Commonwealth has decided to take action on the subject is a great step forward. It is a great step forward in the movement for public ownership.

## SOCIETY PEOPLE BACK FROM EUROPE

President of the Boston Society of the Friends of the Old South has returned from Europe. He has been in Europe for some time.

MR. JAMES H. HARRINGTON

## THE BOSTON AMERICAN INVITES YOU TO JOIN A NEW CLUB

The Boston American is organizing a Co-operative Club to supply its readers and friends with a good Encyclopedia. This newspaper receives hundreds of letters daily asking questions which could easily be answered by such a work.

If you can afford only one set of books, by all means let it be an Encyclopedia. It sums up the knowledge of ages. In THE NEW STANDARD you will find complete and accurate information on every subject, written in words that all can understand.

An Encyclopedia for Every Home

The New Standard Encyclopedia was selected for this great enterprise because we believe that it is the latest and best reference work for the home, for the busy man and for the school students of all ages. It differs from all other Encyclopedias in that it is adapted to present day needs; its articles are not technical, dry, nor hard to read, but are written in such a clear and interesting manner as to invite further reading. It is a good, practical Encyclopedia, written by practical men for practical people. You can find here just the information you need, quickly, conveniently, and in the most comprehensive and concise form. This Encyclopedia, although only recently completed, has been widely adopted for use in schools and other institutions, and it is recommended by leading educators everywhere. It is published in twelve massive volumes, which contain 55,000 complete articles—almost 900,000 topics—8,000 illustrations, 150 large colored maps, etc. It is a complete home university in itself, containing the equivalent of 100,000 separate volumes boiled down and condensed. More than 200 of the world's Greatest Scholars and Educators are among its editors and contributors.

It Will Cost You Nothing

If you have no Encyclopedia, at all, or if you have one that is old and unsatisfactory, it will cost you nothing to get full particulars of this wonderful opportunity, which is now open to you, but which will not remain open long. The accompanying coupon, which should be mailed promptly, does not obligate you to join the Club, but merely signifies that you are interested, and would like to receive full particulars. On receipt of same we will send you a little book made up of specimen pages from the Encyclopedia, showing some of the illustrations, portraits of prominent men, maps, beautiful colored plates, sample articles, etc., etc. With the specimen pages we will send full particulars of the Club, showing how easy and simple it is for you to secure the benefits of this Co-operative enterprise.

This offer is made only to responsible men and women

Mail This Coupon Today—

Note

OUR OBJECT

Heretofore good Encyclopedias have been put on the market at abnormally high figures, ranging from \$80 to \$160, prices which only the rich could afford to pay.

Our Club illustrates the enormous advantage of Co-operation. Complete sets are shipped direct from the publishers to the purchasers—no middleman makes a profit.

**MOTHER, SON, LONG  
PARTED, MEET IN  
HOSPITAL.**

Affecting Reunion, After Sea  
Journey of Thousands of  
Miles, of Azores Woman and  
Boy Grown Rich in America

There was an affecting meeting at Carnegie Hospital yesterday between the young mother and son. The woman had taken the "baby" of her dreams to the hospital for the purpose of placing it in the hands of the nurses to be reared as a normal child. Her husband, who had been away for a long time, was with her. The woman had been told that the child would be a normal child, and she was very happy to hear that. The woman had been told that the child would be a normal child, and she was very happy to hear that. The woman had been told that the child would be a normal child, and she was very happy to hear that.

## Why We Sell Cheaper

*The profits of any business are based on the amount of expense of conducting same. Our expenses are small. Our rent, on account of the location, is very low. The business is under the management of the owners, thereby saving the expense of large salaries.*

**For these reasons** we can sell cheaper. **ALL** we ask is that you call and compare our prices with others before you buy. Our liberal credit system enables you to furnish your home now and pay for it as you earn the money. Space will not permit us to show all the goods in our vast stock but the few articles represented here will give you some idea of the enormous values we are offering.

**Dressing Case**  
Sells each with inside finished, 3 large drawers, top 14 1/2 inches deep, 2 small drawers below, 14 1/2 inch deep French lock, \$12.00 each. French lock, \$12.00 each.

**Shawmut Grand Range**  
Monthly we hot breakfasts and for the day, \$17.50

**Shawmut Oak Stacks**  
Pine \$12.00, \$17.50

**Chiffoniere**  
This illustration made of solid material, oak, glass, metal, has 5 small front drawers, oak, cast, brass, iron, and a large one, \$12.00 each.

## Only one important game played on the West end in that Princeton won from Harvard 12 to 0

Princeton won the game by a steady and consistent play, and the victory was a well-earned one.

## By Morton Birge.

Brown did not want to score on Harvard.

## Van wish.

Under the dull gray sky of a mild October afternoon fifteen thousand collegians and other football enthusiasts saw the heavy Harvard eleven take the light but speedy Brown players by the score of 10 to 0 in the Harvard Stadium yesterday.

It was a good game to see from the spectators' standpoint, especially. There was all kinds of football. There were line-smashing plays by the Crimson men, there were clever open plays by the Brown lads, who hoped that speed and fast footwork would counter where weight was lacking.

There was the steady, up-bill fight of the visiting eleven, hoping against hope that it could send a runner over the goal line. There was the continuous and practically unweakened resistance of the superior team, playing hard and fast enough to keep its goals out of any real danger. It was a quick game, comparatively clean and comparatively free from injury to the players.

It was almost too warm for the spectators, but delightfully pleasant for the players, who could sit still and watch without shivering and sweating.

## WON \$1,500 IN 3-DAYS' POKER GAME AT SEA

George A. Kessler the Happiest Man to Step Ashore from Le Karsine.

New York, Oct. 28.—Miss Kate Kessler won \$1,500 in a three-day poker game at sea.

## A SHOW OF FASHION.

Miss Johnston found it exceedingly comfortable. The big warm fur, the cozy rug and blanket, the heavy wraps were little in evidence.

Of course, Fall fashions were there. The new hats and the new long cloaks were the attractive features of the fashionable crowd. Hat coats were unbuttoned and lapels were thrown back to the mid air.

It is even a fact that while dresses were seen there. They looked odd at first, but in evidence.

# Lulu and Leander!—They Take an Automobile Trip

Copyright, 1936, by the American Journal Examiner. Great Britain Rights Reserved

1. LEANDER: "Ah, Lulu, everything is going along with such smoothness, everything seems so bright, that I feel that my bad luck has left me."  
LULU: "I hope so, Leander. But DO be cautious."  
POPPER (singing): "B-r-r-r! B-r-r-r! B-r-r-r!"  
MOMMER: "Just look at him. Nothing has happened and he is getting chatty."

2. LEANDER: "Oh, just look at his porkchops! See me give him a bump!"  
LULU: "Oh, Leander, please don't! Didn't I warn you to be cautious? Then don't stir up trouble!"  
MOMMER: "If he hits that pig I'll have the Cruelties on him."  
POPPER: "B-r-r-r! B-r-r-r! B-r-r-r!"

3. LEANDER: "Hoops! I'm the Most Trust! Another rise in pork!"  
LULU: "Oh, Leander, you cruel, cruel man. Why did you do it?"  
MOMMER: "He'll get the worst of this, I'll wager."  
POPPER: "B-r-r-r! B-r-r-r! B-r-r-r!"

4. POPPER: "W-E-E-O-W! Help! MURDER! Who threw it? What is it?"  
MOMMER: "Leander did it! A new method of assassination, that's what it is!"  
LULU: "Oh, Leander, just see what you have done!"  
LEANDER: "Ye gods! Who would have thought of THAT?"

5. POPPER: "You will, will you! Will, take THAT!"  
MOMMER: "Good for Popper! Soak him another, and another, and another!"  
LULU: "Oh, Leander, I warned you, I warned you, I warned you!"  
LEANDER: "W-E-E-O-W!"

6. POPPER: "It's, but At last! Even the worm will turn!"  
MOMMER: "Hoorsy for Popper! You gave it to him good that time! Oh, Popper, you look like a See the Conquering Hero Comes!"  
LULU: "It serves you right, that's all I have to say."  
LEANDER: "Ye gods! Now I wish that pig had been an elephant, then my trials and tribulations would have been over!"

## OXY RANDPA

With the Kind Assistance of Muddy Slowfoot, Esq., Foxy Grandpa has Some Fun with the Boys, and Enjoys a Laugh on Muddy

1. GRANDPA: "Here come the boys. Now, you understand, act and do as I tell you, and watch for the fun!"

2. GRANDPA: "Why, hello, boys. Just in time to see me do a lightning change. Watch the door. I will immediately appear as Muddy Slowfoot, the king of the frames."

3. MUDDY: "Hello, boys. How is dis for a quick changer?"

4. MUDDY: "Here, boys, don't you know your ole Gran'paw? Come and give him a kiss!"

5. GRANDPA: "Here is a dollar, Muddy, for the fun I had. Now skip along quickly before the boys get over their fright and 'catch on'."

6. BOYS: "Why look, Gran'pa, you have even fooled Stub. Come back and kiss your boys before you go."

## BOYS A COMPLETE FOOTBALL OUTFIT FREE!

**BOYS!** These outfits are perfect in every way.

**THE JACKET** has front and neck re-enforced. All the seams are double sewed. The armholes are large. The sleeves are worked with thread so as not to rust or pull out. A strong lacing cord is included.

**THE PANTS** are made exactly like the illustration. The new style of padding the thighs gives a better fit and lightness. The hips and knees are covered with very thick padding. The pants are top-lined, triple-sewed, fitted with 5 belt straps, a patent fly front with non-rustable zippers and a strong garter at the knee. A strong and handsome belt with nickel plated buckle comes with the pants. **THE WHOLE OUTFIT IS GUARANTEED TO BE PERFECTLY SATISFACTORY IN EVERY WAY, SHAPE AND MANNER.**

We give the whole outfit absolutely free. Just send your name and address for only 24 pieces of our new small art jewelry, which every one will be glad to buy at 10 cents each. It costs our \$2.40 after you have sold each, and we will send you at once, without delay, the whole outfit described above and any size you want. Write to-day. Address:

**FRIEND SUPPLY CO., Dept. 310,  
No. 1 Washington St., Boston, Mass.**

---

## STRIKING BAG AND ALL ATTACHMENTS

**2 PAIRS BOXING GLOVES**

**THE GLOVES** are the real Fittessman style, long, seven-ounce design. Yucca leather, filled with best curled hair, carefully inspected and guaranteed satisfactory. We send two pairs—four gloves in all.

**THE STRIKING BAG** is fast also, wine-colored, made of extra quality belted leather, and leather. Brandy was thoroughly dyed the strong green rubber bladder. Adjustable cord and serves you with the bag.

## BIG BEAUTY DOLL SLEEPING DOLL and Complete Sewing Outfit

SHE IS NEARLY TWO-THIRDS OF A YARD TALL! This is the largest and most beautiful Great Big Doll that we or any other firm ever gave away. And she has a magnificent head, with real curls hanging down on her shoulders and lovely big eyes that go to sleep. She wears an immense lace picture hat, trimmed with pretty ribbons. The daintiest blouse front and the handsomest Eton jacket that a doll ever wore, all made gay with ribbon and white embroidery and tastefully lined; a beautifully flowered, bell-shaped skirt, delicate lace-trimmed underwear, white stockings and white kid shoes, all in the latest style, make the costume of this doll perfectly splendid. YOU CAN HAVE THIS DOLL YOURSELF.

Send us your name and address for only 24 pieces of our New Art Jewelry Novelties, which every one will buy of you. Our goods are worn by the best families. Sell them and return our \$2.40 received from the sale and we will send you at once, without the slightest delay, this great, big, beautiful, dressed, jointed and sleeping doll. WE GIVE YOU THIS DOLL ABSOLUTELY FREE, AND WITH HER WE GIVE YOU ALSO THE COMPLETE COMBINATION SEWING OUTFIT, JUST AS SHOWN HERE IN THE PICTURE. BUT MANY TIMES LARGER.

**THIS HANDSOME SEWING CASE** contains buttons, bobbins and eyes, embroidery silk, and eight spools of sewing silk, in various colors. It is something to give to every little girl home to sew. Sewer, remember, we give this doll and sewing outfit together without delay. Write to-day. Address:
